How visuals are used in this edition

WHY THESE IMAGES ARE USED

This version avoids links to competitor websites. All visuals inside the catalogue are internally prepared illustrative images that help the reader quickly identify the product family: standard engine camshafts, camshafts with gear, balancing shafts, timing gear items and fuel-pump related shafts.

BALANCER SHAFT

GEAR / THRUST PARTS

FUEL-PUMP SHAFT

ORDERING RULE: Always quote by original number, engine model and quantity. The illustration is helpful for presentation, but the original number remains the primary reference for quotation and supply.
